Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 1/27/05, 2/24/05 and 3/17/05.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/24/05 has been entered.

Election/Restrictions

Claims 14-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse on 3/15/04.

Drawings

The drawings filed 3/17/05 are objected to because: in Figure 8, grooves 414 and 420 and thus cavity 418 should be clearly depicted, i.e. the grooves should be discernible; in Figure 9, grooves 460 and 464 should be clearly depicted, i.e. the grooves should be discernible; in Figure 10, groove 514 should be clearly depicted, i.e. the groove should be discernible; in Figure 10, 518 does not reference the recess; in Figure 11, 618 references the o-ring and not the groove; in Figure 11, 604 references

two separate o-rings; in Figure 11, the leftmost numeral 604 does not clearly reference the o-ring; in Figure 11, grooves 620 and 622 should be clearly depicted, i.e. the grooves should be discernible; in Figure 12, the recess 712 is not clearly shown; in Figure 12, numeral 714 is used to reference both the bore and the washer. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, from claim 21, the male connector connected to the fitting member, and a bore passing through the port,

fitting member and male connector as they are claimed in claim 18 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Claim 18 is drawn to the embodiment depicted in Figure 8, as Figure 8 is the only figure described as having a cap portion. Although the male connector is depicted in Figures 11 and 12, these embodiments are not described as having a cap portion. A new figure should be provided showing the male connector connected to the cap portion and assembly of Figure 8 with a bore passing through the port, fitting member and male connector of Figure 8.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

On page 16 lines 10-11, "within to" should be "within".

On page 16 line 17, how does numeral 462 show an inner surface of the plug?

Appropriate correction is required.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the seal portion, the annular shoulder portion, the phrase "wherein the cap portion includes an annular shoulder portion, wherein the shoulder portion has a diameter at least equal to or greater than a diameter of the cap portion", and the phrase "a port for partially receiving the shoulder portion of the fitting member, wherein the shoulder portion is operable to seal the port when the shoulder portion is partially received in the port".

Response to Arguments

Applicant's arguments, see pages 10-12, filed 1/27/05, with respect to the 35 U.S.C. 103(a) rejection of claims 18-21 as being unpatentable over Kimura '489 in view of Boynton '920 have been fully considered and are persuasive. This rejection has been withdrawn.

Allowable Subject Matter

Claims 18-21 are allowed.

Conclusion

This application is in condition for allowance except for the above formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

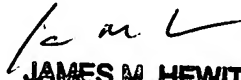

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
